

Dear Sirs:As an XM satellite radio subscriber I take issue with petition 04-160 from the NAB regarding limiting the content available via satellite radio. Certainly you folks have more important issues to decide than whether or not local weather and traffic broadcasts are available to me via satellite. I am a subscriber to XM radio because I can choose what content I want to listen to. I am willing to pay for this free choice. I do not believe my choice of programming should be limited by any organization - particularly one representing a competing group.

Thank you,
Thomas Bauer Jr.
